

VERSION 1 - DRAFT

PORNVISORY WHITEPAPER

**ALL YOU NEED TO KNOW
ABOUT PVY**

PORNVISORY.COM

INTRODUCTION

Pornvisory and PVY

Pornvisory.it and Pornvisory.com were born a few months ago with the idea to have two blogs about pornography, in Italian and English language. The idea, like the name of this initiative suggests, was to advise people what to watch, in order not to lose too much time to scroll the millions of pages of a website like Pornhub.

It had to be a sort of IMDB of porn videos, realized both from amateur and professionalism. To include more contents, we also created other sections for interviews, news and sex toys. In Italy, in particular, there is not something similar. However, this idea of an editorial product missed something, as all the founders work in the crypto world, with this kind of background and knowledge. That's why the PVY token came into existence. PVY is an ERC20 based on Ethereum and created by a DFO.

PVY AS A UTILITY TOKEN

“Watch porn and get paid in cryptocurrencies”.

The main usage for the PVY token is a utility token that will be used within the platform to reward people who interact with our websites and watch videos. In fact, Pornvisory’s main motto is “Watch porn and get paid in cryptocurrencies”.

The system will work in a similar way like Brave with its BAT token, or Theta and Ultra. Users will be rewarded to watch porn, share articles on social media, invite friends and so on. E.g. You watch a video and you get paid, like it happens if you watch ads on Brave and you get paid in BAT.

NO ICO BUT A FAIR INFLATION

Pornvisory will sell some tokens on the market

Pornvisory decided not to launch an ICO or IEO as the team believe they are not an interesting method to earn money from. In a trustless world, as the crypto sphere is, Pornvisory doesn't want to ask you for trust, so there will be no token sale.

However, of course, to develop the project, Pornvisory needs to raise money. Pornvisory was born using the funds of its own founders and they will continue to do it as long as Pornvisory will need it. However, to better clarify, the inflation model works like that: basically, Pornvisory will sell some tokens on the market (from 1000 to 5000 PVY per day).

TOKEN DISTRIBUTION

The following is the PVY token distribution:

Pornvisory (PVY) tokens have been divided into several tranches, where each allocation is intended for a specific purpose. For transparency and to simplify your monitoring, we created several independent accounts – i.e. dedicated ETH addresses – where tokens related to each spending chapter have been transferred.

- Airdrop address:

0xBED88B16eFd0E2B2a35E0370cf9490C405
C2e14a

Allocation: 5,000,000.00 PVY

- Reward address:

0x26966683B1daf18A82Fc83BecF1F52dE73d
44724

Allocation: 10,000,000.00 PVY

- **Staking reward address**

0x723602a9A12cd748F40651d638A5Ec69b9
bB7E6a

Allocation: 10,000,000.00 PVY

- **Team address**

0x43BaB65bB1e87351e954480eCd1Dc51e8c
7efA8c

Allocation: 10,000,000.00 PVY

- **Reserve address**

0xFf01C3045c0EC76851a3E1c69651C0290e
Fd3144

Allocation: 33,500,000.00 PVY

A further **1,500,000.00 PVY** was paid to the **DFOHUB team** as a fee for the deployment of the "Pornvisory DFO".

This is the TX hash:

<https://etherscan.io/tx/0x495d9fa6edd2dca74a8d820d5a615c4963e0169ea7d40e3e39a615a8a04dbe57>)

Additional 30,000,000.00 PVY – net of what has already been used to create liquidity on Uniswap V2 and what has been put on the market to feed the development – will remain in the original address where the token contract was deployed.

DFO HUB

DFO governance enables token holders to propose changes and vote on governance aspects that will be subject to community voting, so the first use for PVY is voting. For example, Pornvisory did let people vote for the staking program, if they agreed on the staking modality. Other examples can be votes on the design of NFT, vote on kind of contents, vote on changing the website or changing staking rules, and so on...

DFOs are on-chain organizations that resemble decentralized autonomous organizations (DAO) but that further emphasize the community's ability to shape the services: while a DAO handles some control over to the users, a DFO allows for any aspect of the decentralized application to be changed.

DAOs allow the community to set the DApp's configuration parameters, while DFOs allow them to change the code thanks to a modular design. In a DFO, users can cast votes in an anonymous and censorship-resistant way, because the code can be saved on-chain and becomes readable to all forever.

PVY TOKEN ECONOMY

How to attract new customers

So, the idea is to give tokens to those who watch videos or interact on Pornvisory.it and Pornvisory.com. By doing this, visits on the websites should grow because people are encouraged to watch both sites to earn tokens.

This would bring traffic to the sites and so the first value for the company is to sell advertising, as a typical traditional business for which sell articles, banners, links, etc.

- SEO for website and content creation: right now we publish 1 article every day;
- Social media marketing;
- Influencers of porn and crypto;
- PRs on worldwide magazines;
- Airdrops;
- Partnership with crypto and porn companies.

HOW TO USE PVY

- Buy advertisement at a discount on the site, so you get a 30% discount on advertising if a client buys with PVY. The 50% of the total will be burned;
- Integration with ecommerce, cam or sex toys sites that accept PVY as a payment method;
- Exclusive NFT purchase with erotic theme on OpenSea, which can be paid only with PVY.
- PVY to buy exclusive Pornvisory services and products;
- Privacy for porn, PVY is used with wallets without going through banks or Paypal that have names and surnames;
- Governance: with PVY you can vote for proposals;
- Staking with reward up to 50% for 1 year if you vote on proposals;
- Gaming platform to play with NFTs.

ROADMAP

- Creation of 2 websites and social media ✓
- Content creation (we publish one or more articles per day) ✓T
- token listing on Uniswap and Balancer ✓
- Official announcements on crypto magazines ✓
- Users login activation on the website ✓
- First Airdrop ✓
- Staking and governance ✓
- NFTs on sale on Opensea ✓
- Gaming platform to play with NFTs;
- Gamification platform planned to be released. The gamification allows an user to get paid in PVY after the view of a video or after a social media sharing. E.g. you watch 1 minute of a video and automatically you receive 1 PVY. It takes time to develop this because we need to be sure we are not attacked by bots. PVY on other blockchains to have more partnerships and a bigger community.
